118 THE NATIONAL CHEVY ASSOC.TM
POLY GAS TANK
Molded to original dimensions with ease of installation in mind. Use your gas line. Complete with hardware and installation instructions. The poly gas tank is made in the USA, and was designed exclusively for 1949-54 Chevrolets with the latest technology. With safety and durability in mind the poly tank will never rust and is made to last. Most new cars use a poly tank for this exact reason. The alcohol in gasoline will separate and sit at the bottom of the tank causing rust issues in a steel tank. With your safety and restoration in mind the poly tank is recommended for hassle free maintenance, and to keep your old Chevy on the road for years to come.

Includes new sending unit.

GAS LINES

SEDAN GAS LINE ORDER #1398 $89.00

HARDTOP GAS LINE ORDER #1371 $89.00
Steel one-piece gas line that runs from fuel tank to fuel pump. Reproduced with original bends and fittings. (Due to size restrictions, a large radius bend is added to a straight section of the line for shipping purposes. This facilitates easily returning the line to it’s proper configuration.)

C GAS LINE FRAME CLIP ORDER #1418 $5.00 ea.
Used to hold fuel line to frame of car. (Requires 5 per car.)

CONVERTIBLE GAS LINE (2 PC.) ORDER #1370 $94.00
